

## Supplementary Appendix

All genome sequences and associated metadata supporting the findings of this study can be accessed through the persistent digital object identifier <https://doi.org/10.55876/gis8.260929tv>

In addition to the minted DOI, GISAID also communicates the aggregation of GISAID accession numbers (EPI\_ISL\_IDs) through the corresponding EPI\_SET\_260929tv identifier to facilitate both, the acknowledgment of all data contributors and the direct retrieval of the underlying data from GISAID used in this study.

### Influenza Virus Data Summary

| GISAID Identifier | Digital Object Identifier                                                                   | Number of individual viruses | Data Collection range    | Number of countries/territories |
|-------------------|---------------------------------------------------------------------------------------------|------------------------------|--------------------------|---------------------------------|
| EPI_SET_260929tv  | <a href="https://doi.org/10.55876/gis8.260929tv">https://doi.org/10.55876/gis8.260929tv</a> | 10,099                       | 1968-01-01 to 2026-02-03 | 44                              |
